Data center : Switchgear & switchboard *solutions*

Low voltage

Power Control & Distribution

MADE IN FRANCE 

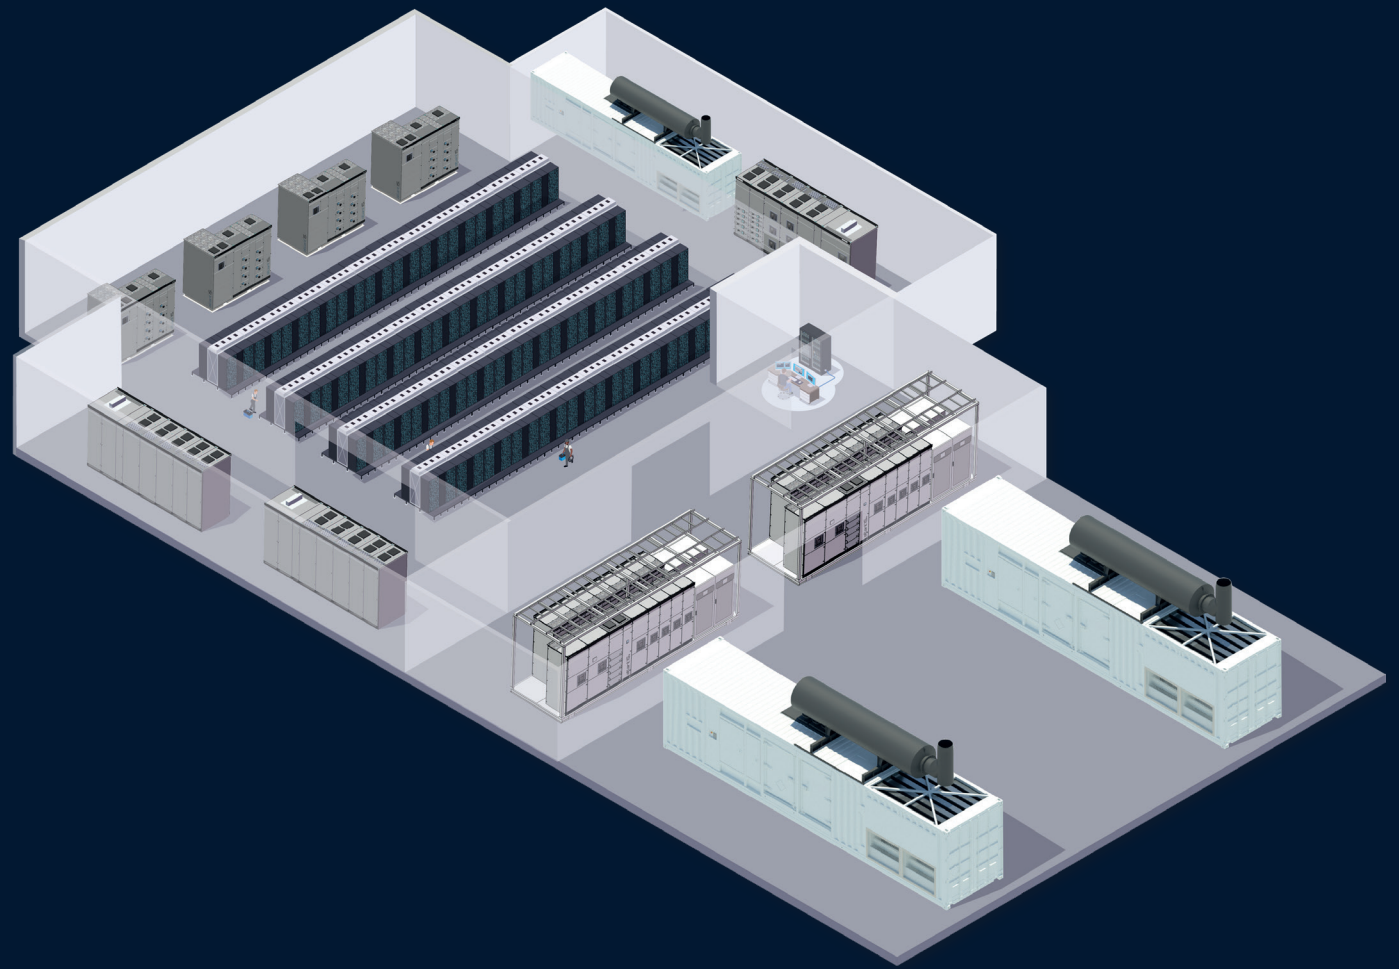

Data center solutions

A customizable and industrial approach

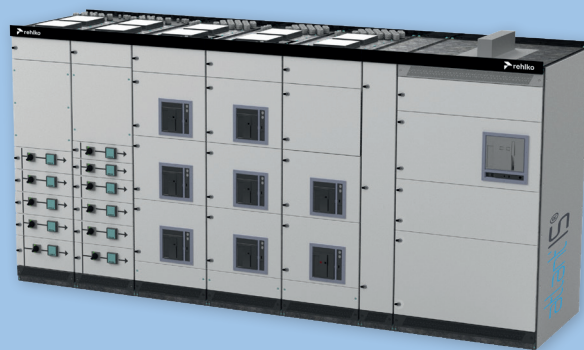

Our atlant'IS original manufacturer switchboards and switchgears provide a robust protection against power failure, avoiding costly downtime and losing data. They meet the highest requirements to ensure the safety of people and properties. Our switchboards and switchgears are designed to withstand the most demanding environments. They thus ensure durable performance.

For many years, we've been implementing an ecodesign approach in the making of our products and solutions. We often take part in trainings about this. This approach will allow you to control and distribute power in your data center while reducing your environmental impact and enjoying economic competitiveness.

atlant'IS® Switchboard

- ✓ IEC 61439 – 1 & 2
- ✓ Up to 6300 A & I_{cc} : 130 kA
- ✓ Service Index : IS 211 to IS 333
